Dear Greg

**Rosemerry Subdivision – Stages 18A and 18B
Geotechnical Completion Letter Report**

This geotechnical completion letter report is submitted to fulfil the geotechnical requirements of Condition 21 of the Selwyn District Council Resource Consent RC185574.

1 Introduction

As part of the Fulton Hogan Land Development Limited (FHLD) Rosemerry Subdivision Development located at Lincoln, Aurecon has completed a geotechnical investigation and assessment for Stages 10 to 18, including the area now known as Stages 18A and 18B. The investigation and assessment are detailed in the Aurecon geotechnical report "*Rosemerry Subdivision, Lincoln, Stages 10 to 18 Geotechnical Investigation Report*", dated 25 September 2015.

2 Liquefaction Hazard Assessment

The report was issued following the publication of the Ministry of Business Innovation & Employment (MBIE), guidelines in December 2012 and subsequent updates in 2014, which define the Technical Category zoning and the liquefaction induced deformation limits for each Technical Category.

The categories and corresponding criteria are as follows:

- **Technical Category 1 (TC1)** – Future land damage from liquefaction is unlikely, and ground settlements are expected to be within normally accepted tolerances.
- **Technical Category 2 (TC2)** – Minor to moderate land damage from liquefaction is possible in future large earthquakes.
- **Technical Category 3 (TC3)** – Moderate to significant land damage from liquefaction is possible in future large earthquakes.

The indicative vertical and horizontal displacements associated with each Technical Category classification, together with the impact of liquefaction on house foundations, are presented in Table 1 below.

Table 1 Liquefaction Deformation Limits and House Foundation Implications

Technical Category	Index Liquefaction Deformation Limits				Likely Implication for House Foundations (subject to individual assessment)	
	Vertical		Lateral Spread			
	SLS	ULS	SLS	ULS		
TC1	15mm	25mm	Nil	Nil	Standard NZS3604 type foundations with tied slabs are acceptable subject to shallow geotechnical investigation.	
TC2	50mm	100mm	50mm	100mm	MBIE enhanced foundation solutions.	
TC3	>50mm	>100mm	>50mm	>100mm	Site specific foundation solution.	

A liquefaction hazard assessment was carried out as part of the site assessments in 2015 using the prescribed in the Ministry of Business, Innovation, and Employment (MBIE, 2014) guidelines for residential development in Canterbury following the Canterbury earthquake sequence.

The liquefaction analysis for Stages 18A and 18B was based on the boreholes and CPT testing carried out as part of the geotechnical investigations for the larger subdivision. The geotechnical investigation information used to assess Stages 18A and 18B is part of a large group of geotechnical information and only the tests that are relevant for this stage have been assessed. Consideration was given to information and data from outside the stage boundary when assessing geotechnical hazards and issues.

3 Technical Category Classification

Based on this assessment and, observed site performance, we consider that:

- **Lots 688 to 740, and 742 to 749 fulfil the requirements of a TC2 Classification.**
- **Lots 625, 1017 to 1019, 1025, 1026, 1035, 1036, 7009 to 7011 roading, utilities, and reserve areas; therefore, no Technical Category Classification is applicable for these lots.**

4 Clayey-Silty Soils

Investigations undertaken by Aurecon indicate soft to firm silty and clayey soils may be encountered at shallow depths across the entirety of Stages 18A and 18B of the Rosemerry Subdivision. However, as Stages 18A and 18B are expected to have a performance equivalent to TC2 and therefore standard NZS3604 type footings are not appropriate.

Lot specific shallow geotechnical investigations will be required for all lots as part of the detailed building design process. The anticipated bearing capacities from the near surface soils are likely to be readily accommodated by a TC2 type foundation system, pending detailed foundation investigation and design at building consent stage.

5 Additional Comments

Bulk earthworks and compaction signoff have been observed and sign-off separately by the project Civil Engineers Davie Lovell-Smith Ltd.

Aurecon has geotechnically investigated and assessed Stages 18A and 18B on a subdivision wide scale only. Aurecon has not undertaken lot specific shallow geotechnical investigations, intended to support detailed house foundation design.

6 Recommendations

Due to the identified underlying ground conditions (TC2 and with the potential for softer silty soils) lot and building specific shallow geotechnical investigations shall be undertaken for all lots in Stages 18A and 18B in accordance with the requirements of NZS3604.

This report is not intended to be used for detailed design of site-specific shallow foundations and is not suitable to support individual building consent applications. Site specific investigations are required at building consent stage.

8 Explanatory Statement

The contents of this letter are for the sole use of the Client and no responsibility or liability will be accepted to any third party. Information or opinions contained within this letter may not be used in other contexts or for any other purposes without our prior agreement.

The comments in this letter are based on our investigations of the site for the sole purposes of the geotechnical aspects only, as requested by the Client. Only a finite amount of information has been collected and this letter does not purport to completely describe all the site characteristics and properties.

The extent of our investigations and the results of all the tests carried out are as presented in the geotechnical report for Stages 10 to 18 “*Rosemerry Subdivision, Lincoln, Stages 10 to 18 Geotechnical Investigation Report*”, dated 25 September 2015.

We trust this meets your requirements and if there are any further queries please do not hesitate to contact us.

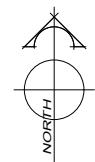

Yours faithfully

Dr Jan Kupec
Technical Director – Ground Engineering

Enc: SDC Approved Subdivision Plan for Rosemerry Subdivision Stage 18

Stage	Residential Lots	Drainage Reserves	Recreation Reserves
15	42	-	-
16	45	917m ²	-
17	57	-	4546m ²
18A	41	78m ²	-
18B	20	2235m ²	1.6078ha
19	42	9108m ²	-
20	35	8469m ²	-
21	49	1397m ²	-
22	28	-	-
23	30	-	-
24	35	183m ²	-
Completed Stages	458	1,0248ha	2.8845ha
Proposed Stages	424	2.2387ha	2.0628ha
TOTALS	882	3.2635ha	4.9473ha

AMENDMENTS :		
R10	25/09/2020	STAGES 15, 16 & 17 BOUNDARIES UPDATED TO TSS, ROAD NAME ADDED
R11	3/12/2020	STAGE 15 UPDATED TO UNDER CONSTRUCTION
R12	02/03/2021	STAGES 15, 18, 19 & 20 BOUNDARIES UPDATED TO TSS
R13	21/04/2021	LOTS 788 & 7013 AMENDED
R14	1/06/2021	COMPLETED STAGES UPDATED
R15	1/07/2021	LOTS 819 - 821 & LOTS 617 - 620 AMENDED
R16	17/12/2021	LOTS 819 & 1028 AMENDED

- NOTES :
- 1) Areas and dimensions are approximate only and are subject to final survey and deposit of plans.
 - 2) Service easements to be created as required.
 - 3) This plan has been prepared for subdivision consent purposes only. No liability is accepted if the plan is used for any other purposes.

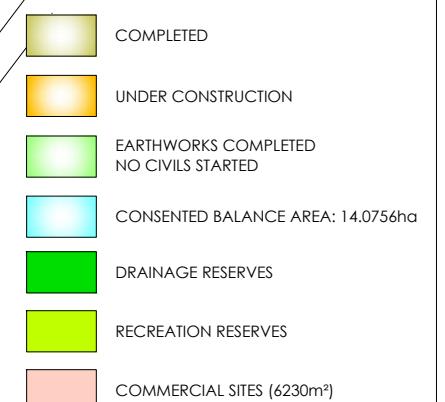

STAGES 13-24 SCHEDULE OF AREAS

Description	Area
Residential Lots (Average: 745m ²)	37.7946ha
Roading	11.9049ha
Reserve	2.5056ha
Drainage Reserve	2.3246ha
Sewer Pumpstation	160m ²

STAGES 13-24 DENSITY

Total Area	54.5461ha
Net Area	52.2214ha
Lots	534
Lots/ha	10.226
OVERALL DENSITY	
Total Area	91.6704ha
Net Area	87.7839ha
Lots	882
